Vyshgorod

Profile

My name is *Danil*. I am **proactive** and **attentive** to details. I have practical experience in Front-End development in creating adaptive, interactive, and high-performance web application interfaces. I am proficient in modern *web technologies* (HTML5, CSS3, JavaScript, Tailwind CSS) and UI/UX design principles. I have a good understanding of component architecture, REST APIs, version control (Git), and responsive layout. I *have basic skills* in setting up PCs, routers, configuring printers, and other network devices. **I am a fast learner, a team player, and interested in professional growth in a dynamic environment.**

Experience

Upwork · Feb.2024 — Mar.2024

Front-end developer   Remote

- Development of responsive and cross-browser web interfaces using HTML5, JavaScript, and Tailwind CSS.
- Transferring designs from Figma to high-quality, semantic code.
- Implementation of functional elements: animations, sliders, forms with validation, and interactive components.
- Optimising website performance: reducing loading time, lazy-loading images, and SEO content structuring.
- Communication with international clients, formulation of technical specifications, project evaluation, and independent management of the development process.
- Execution of projects in compliance with deadlines and quality requirements.
